

AKASH SIMHADRI

📍 Andhra Pradesh, India ✉ akashsimhadri4@gmail.com 📞 9390439022 📄 Portfolio in LinkedIn 📁 GitHub

Objective

To leverage strong analytical skills, programming expertise, and a passion for AI to develop intelligent data-driven solutions that drive business value and innovation.

Skills

Programming Languages: Python, Java, JavaScript, SQL

Web & Backend Development: React.js, Node.js, MongoDB, Express.js, HTML, CSS

AI & Machine Learning: Pandas, NLP, LSTM, CNN, Scikit-Learn

Tools & Workflow: Jupyter, Git, GitHub, VS Code

Concepts: Data Structures, OOP, REST APIs

Soft Skills: Problem-Solving, Teamwork & Collaboration, Communication, Leadership, Adaptability, Time Management

Education

Kalasalingam Academy of Research and Education

Sept 2022 – May 2026

B TECH in Computer Science -8.39/10.0

Experience

Web Developer Intern

Hyderabad, India

Ublood Pvt. Ltd

May 2024-July 2024

- Developed responsive web modules using HTML, CSS, JavaScript, and Node.js, improving user interaction by 30%.
- Collaborated with a 5-member team to implement scalable UI components and REST APIs.
- Utilized technologies such as HTML, CSS, JavaScript, Node.js.
- Optimized backend queries, reducing load time by 20%.

Online Internship Program : Data Science

November 2022-January 2023

Learnwik

- Completed a comprehensive online internship program in data science offered by LearnWik, a leading Platform for online education.
- Developed practical skills and gained valuable insights into various aspects of data science, including Data manipulation, exploratory data analysis, predictive modeling, and machine learning.

Projects

SkillForge – Full-Stack Learning Management Platform:

📄 [SkillForge – Full Stack LMS | GitHub](#)

- Built a full-stack LMS platform using MERN and TypeScript supporting user authentication, course management, and real-time assignment tracking.
- Designed RESTful APIs and implemented JWT authentication.

Campus Connect – Student Networking & Event Platform:

📄 [CampusConnect | GitHub](#)

- Developing a full-stack web platform to connect students, faculty, and clubs for event management and collaboration.
- Currently implementing secure **user authentication, event creation, and registration modules** using the MERN stack.
- Designing scalable REST APIs and MongoDB schema for handling large student communities.
- Planned features include real-time notifications, discussion forums, and centralized campus updates.

DONORHUB:

📄 [DonorHub – Donation Platform | GitHub](#)

- Developed a secure donation platform with campaign creation, payment tracking, and real-time analytics.
- Implemented MongoDB for efficient data storage and React dashboards for visualization.
- Designing scalable REST APIs and MongoDB schema for handling large student communities. The platform allows users to create and manage campaigns, track progress in real-time, and engage donors with interactive features.

CUSTOMER CHURN PREDICTION:

📄 [CustomerChurn Prediction | GitHub](#)

- Developed a **machine learning** model to predict customer churn. Leveraged historical customer data to identify key factors influencing churn behavior and build a predictive model to anticipate customer attrition.
- Built predictive models using logistic regression and random forest achieving 85% accuracy.

Achievements

- Completed **MERN Stack Web Development** course from Udemy.
- Successfully completed a **2-month Web Developer Internship at Ublood Pvt. Ltd.**
- Built and deployed multiple full-stack and machine learning projects including SkillForge and DonorHub.
